Brief description of club's goals, projects and activities: Each month we have guest speakers on topics of horticulture, design, conservation and landscape design. In addition to our meetings, we have festive gatherings in December, June and a summer picnic. We enjoy having our meetings at our member's homes so that we can have a more social and intimate setting. We have put on a flower shows, open to the public, and have won multiple awards. Our 12 to 15-member club can boast being one of the most active participants in East Lake Washington District of Garden Clubs earning the nickname "the small but mighty club". We welcome anyone who shares a love of nature, plants and creative design using flowers.
