Club Interests: “Our club began in 1922 with a simple idea: to beautify the city through flowers, plantings and horticulture and fostering educational opportunities, protecting wildlife, sharing the love, beauty and joy of gardening with all in the community. We host monthly programs and Saturday workshops for members. Our most visible project in the community is the annual plant sale in May, where we offer thousands of plants to the public at a reasonable price. We support the local food bank via produce donations grown in our P-Patch. We are involved with civic beautification projects in partnership with the city of Edmonds such as corner plantings.”
